Homework 8

Report

Mustafa Tayyip BAYRAM 257639

Furkan ÖCALAN

1- Button Names Are Changed.

Change button names, Examine => Details, Get Contact => Select Button

2- Sign Up Page Changed

a. Model Year Added

The image displays two side-by-side mobile application wireframes for an app named 'CARZONE'. Both wireframes feature a red header bar with the 'CARZONE' logo and a user profile icon. The left wireframe shows a 'USER SIGN UP' form with the following elements: a title 'USER SIGN UP', four input fields with icons (person, envelope, lock, and phone) for 'Full Name', 'Email', 'Password', and 'Phone Number', two empty text boxes, and a 'SIGN UP' button at the bottom. The right wireframe also shows a 'USER SIGN UP' form with the same four input fields, but it includes three dropdown menus: 'Select Your Car Brand', 'Select Your Car Model', and 'Select Your Car Model Year', followed by a 'SIGN UP' button. The wireframes are designed to show the layout and flow of the sign-up process.

b. Change border colors of inputs.

- 3- Change the truck page to extendible sections.

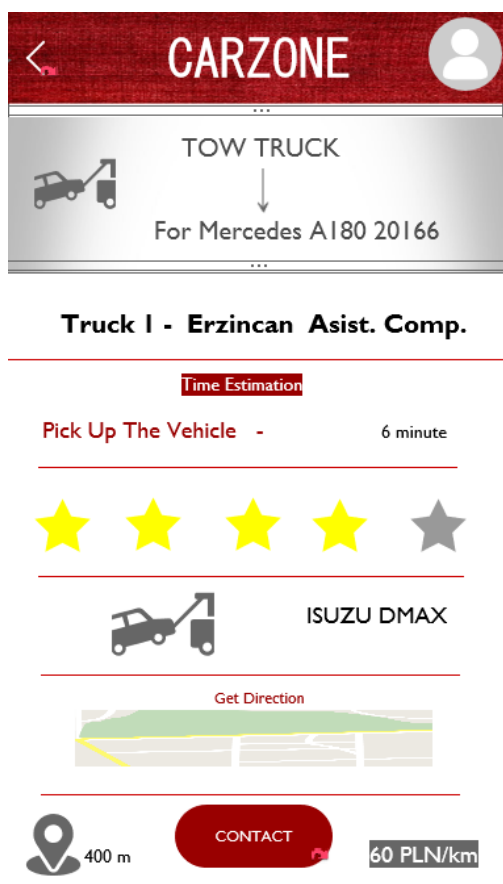

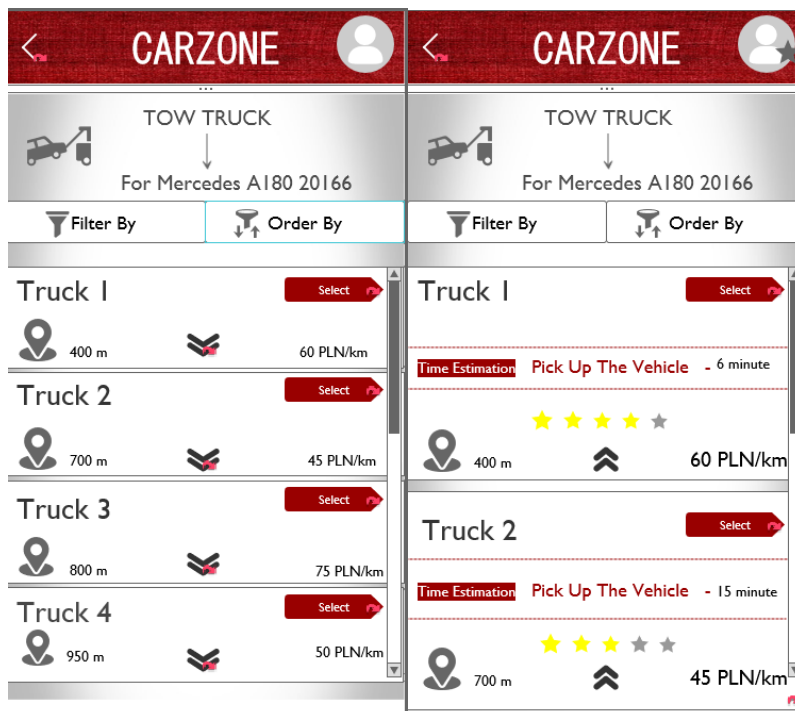

In our prototype creator, there is no such a property to making extendible sections.
For this reason I will present it statically.

It provides us easy comparing.

OLD:

NEW:

- 4- Creating Car Booklet instead of Additional Features.

- 5- Do It Yourself page - arrange in alphabetical order.
