User Stories For Test Scenarios

Admit you own the Mercedes A180 in every story, and log into the application accordingly.

FIRST Scenario

Alex is the Electronic Engineer, and he likes to travel different countries. He is on travelling through to the Turkey from Spain. He notices that the headlight bulb of the car is not working while traveling. He must change headlight bulbs but and he needs to find a place that sells vehicle electronics as soon as possible. He cannot ask everyone because of difference of language and wasting time.

Second Scenario

Kamil is working as a financial consultant for a product marketing company. He doesn't know much about mechanics and cars, also he doesn't have much experience When Kamil goes out for a weekend trip by his car, *strange noises are heard from the front of the vehicle when driving as usual. Even though these sounds make his nervous, he continues to drive the car. Then a big noise sounds and the vehicle stops working. He suddenly goes into the safety lane and thinks about what to do. He doesn't know the insurance company either and he needs to get help.*

Third Scenario

Martin is an extraordinary person; he has a new hobby which is off-road. He has to go the forest by his car and trying to cross the rough and muddy roads. *The weather is cold and rainy, there is exactly what he wants. He does not know exactly this forest he goes to for the first time and begins to explore. He sees a large mud in the distance and thinks it might be a hole. Honestly, this excites him, and he is going fast to the pit. And just currently, his tire explodes. He does not know what to do because he has never changed tires before. He needs something that can explain this situation to him.*
